

Trail A Test Instructions

Sample A: This is a practice test. There are numbers in circles on this page. Please take a pencil and draw a line (as straight as possible) from one number to the next, in order. Start at 1, draw a line to 2, then to 3, and so on. Please **try not to lift the pen** as you move from one number to the next. Your lines should enter the circles, touch the number, and without lifting the pen go to the next number. **Work as quickly and accurately** as you can.

Test A: This is the main test. **You should start recording time for this task using a stop watch. You have 3 minutes to complete Test A.**

As in Sample A, draw with a pencil a line (as straight as possible) from one number to the next, in order. Start at 1, then draw a line to 2, then to 3, and continue until you go to the end (Number 25). Please **try not to lift the pen** as you move from one number to the next. Your lines should enter the circles, touch the number, and without lifting the pen go to the next number.

Start timing as soon as you start this test. **Stop timing when the Trail is completed**, or when **maximum time** is reached (180 seconds = 3 min).

Please submit a picture of Test A to the website and then enter the time it took you to complete Test A (in minutes and seconds). If you reached the maximum time allowed (i.e., 3 min), please enter 3 min and submit your (potentially incomplete) test. You can scan the page with Test A or simply take a picture with a smartphone. You should not submit the Sample A, just Test A.
